"We were particularly impressed by their management of critical path scenarios & quick decision making to provide timely solutions. Contractor implemented very well-defined processes & governance. They did a very good job of expectation & delivery management..."
- Program Director, Amtrak

"eTelligent personnel are seasoned professionals who understand both the client environment and the underlying technology. This knowledge and practical experience is important in identifying potential issues and in risk assessment/mitigation. eTelligent has been exceptionally proactive..." - Project Manager, IRS

Tech Partnerships

Company Capabilities

IT Modernization Services

Providing strategic and transformative services to maintain and enhance business and technology operations. We design, develop, test, implement, maintain, and manage enterprise solutions.

Business Services

Offering business solutions designed to simplify and streamline complicated processes to enhance productivity via implementation of flexible, scalable, and innovative solutions.

Program Management

Furnishing adaptable strategies for various program states, able to lead a PMO governance structure, engage stakeholders, and elicit and gather requirements necessary to implement a solution.

Agile Dev & DevOps

Specializing in an iterative software development process using collaborative Sprint sessions that are delivered through self-organizing, cross-functional teams to quickly deliver functional products.

Web Services & Big Data

Simplifying and automating business processes in order to minimize disruption to existing systems while maintaining and updating existing technologies and integrating new applications and tools.

Cyber Security

Protecting critical systems and environments through policy and compliance, HVA monitoring, vulnerability testing, penetration testing, identity and access management, and risk management.
